

EZICADDY

EZ15 FROM £299

Battery options/price: 18-hole £299,
18-hole Lithium £499

Colour options: Polar white, metallic black

Warranty: Two-year trolley and Lithium
battery and one-year standard battery

OVERVIEW: A digital colour display shows
speed, the automatic distance function, the
battery life and more. A USB port can be used
to charge a GPS device or phone. The battery
design means there is no need for wires.

TEST REPORT

- + A good-looking trolley that folds down to a compact size. The colour screen features plenty of information. The ability to adjust the hand position is a nice touch.
- The orange accent on both colour options will not be to everyone's taste and the orange handles get dirty quickly. The click-in brackets require more force than most to assemble.

VERDICT

A new entry into this competitive market and one that really impresses. The frame, wheel design and unique battery all work well together to create a good-looking trolley. The screen features more information than most will need, but it is well presented. Excellent value for both battery options.
