

TROLLEY OF THE MONTH

EZiCADDY EZi5

Battery options

You can choose from two different batteries - a heavier lead acid cell (6.8kg) or a light, longer-lasting lithium one (2.2kg, upcharge applies)

Control panel

The on-board electronics include a colour digital display, distance control, shot-measuring software, speedometer, clock, and even a USB socket

Bag a freebie

To celebrate the launch of the EZi5, EZiCaddy are giving away a free cart bag with every trolley (while stocks last)

You've been framed

The frame is made from a special aluminium selected for its strength, durability and light weight. It folds and unfolds using a very simple three-way system

Spoilt for choice

You can pick from two frame colours (metallic black or polar white) and also customise the handle and wheel trim colour

Helpful additions

Low profile wheels not only look smart but can be removed very easily, and an adjustable handle makes it easy to use for all heights

SRP: from £299 (lower-spec EZi3 from £249)
